### WITH CHRONIC CONDITIONS: A SELF-MANAGEMENT WORKSHOP

**You can have a chronic condition  
and still do the things you love!**

**A chronic condition** is a health problem that lasts for years and cannot be cured. Some examples of chronic conditions include: arthritis, asthma, cancer, diabetes, headaches, hearing and vision problems, high blood pressure, heart problems, pain, osteoporosis, obesity, and depression. Most people have to learn to live with their health problem.

**The workshop will help you learn how to** achieve your goals, fight fatigue, choose an appropriate exercise plan, improve your eating practices, deal with depression, lessen side effects from medications, get the most out of your doctor's visit, and much more!

**The cost is FREE!** Those who attend will also receive a free relaxation CD and a copy of the accompanying workbook.

**The workshop meets** for two and one-half hours, one time per week, for six weeks. Two trained leaders will facilitate the course. However, most of the learning comes from sharing and helping others with similar challenges.

**Anyone can attend who has one or more chronic conditions.** A friend, caregiver, or relative is welcome to attend along with the person who has the chronic condition. All will benefit from the problem-solving skills related to managing a chronic condition.

**During Bishop Listekci's address to the priests at Priest Unity Days, he spoke about the need for a "common vocabulary" among Catholics. In an attempt to contribute to this need, a certain amount of space (when available) will be used in the bulletin to present various words or terms used in our Catholic Faith with an explanation or definition. The explanations or definitions will come from the Catechism of the Catholic Church.**

**This week's term is:**

**CONTRITION: Sorrow of the soul and hatred for the sin committed, together with a resolution not to sin again. Contrition is the most important act of the penitent, and is necessary for the reception of the Sacrament of Penance**
